

Interprofessional Student Clinical Innovation Challenge Academic Year 2022-2023

The Interprofessional Student Innovation Challenge is a pilot project for the 2022-2023 academic year. Teams of students are challenged with developing and implementing a healthcare project to address an identified healthcare issue within the state of WV as well as an objective of [Healthy People 2030](#).

An interprofessional team of faculty, staff and students will review student projects. The evaluation rubric is available for review and feedback will be provided to all teams who submit a project.

Project Details

- Teams must be components of learners (students or residents) from 2 or more health professional disciplines. Students from non-health professional programs may be part of the team
 - Priority will be given to projects with a greater number of disciplines involved
- The project must address the following:
 - A major health concern in WV as defined by the WV Department of Health & Human Services
 - A Healthy People 2030 Objective
- Projects must be implemented within the state of WV
 - Projects must include development and implementation as well as a sustainability plan
 - Clinical initiatives are encouraged
- Teams can request up to \$2,500 in funding
- Funded teams must collect data throughout their project and disseminate their work through scholarly activities
 - All teams will present their work as a poster presentation during WVU HSC IPE Week once the project is completed
 - All teams will develop an abstract for presentation as a national meeting
 - **Scholarly mentorship will be provided by the IPE/ STEPS Researcher**
- Up to 4 projects will be funded

Application Process

- Project Summary (max 2 pages):
 - Names of students and/ or residents
 - Health professional program of students/ residents
 - Name of faculty advisor for project
 - Email addresses of students/ residents

- Description of project, include project timelines. Please note that the project may span 1 to 2 years
- Project Objectives
- WV Health Challenges/ Healthy People 2030 objectives addressed
- Location(s) of implementation
- What results you hope to achieve at the end of this project (project impact on population)
 - How many people do you hope to impact
- Your plans to collect data throughout the project planning and implementation
- Video clip (5-8 minutes)
 - Introduce team members (all must be part of the video)
 - PowerPoint may be used
 - Overview of the project
 - Objectives
 - Why your group chose this project
 - Why makes this project is innovative? Has it been done before?
 - What results you hope to achieve at the end of this project
 - Your plans to collect data throughout the project planning and implementation
 - Plans for connecting to the community
- Project budget
 - Outline of how the requested funding will be used
- Letter of support from faculty advisor for the project (1 page maximum)
- Please submit by October 3, 2023 by completing the [this form](#)
- For any questions regarding the above information, please contact Katie Smalley (ksmalley@hsc.wvu.edu).

Student Innovation Challenge Submission Rubric

Item	3	2	1	Comments	Student Score (1-3)
Team consists of 2+ disciplines	3 or more disciplines	2 disciplines	Single discipline		
Address a major health concern as defined by WV DHHS	Greatly addresses a major health concern as defined by the DHHS	Slightly addresses a major health concern as defined by the DHHS	Does not address a WV DHHS Health Concern		

Address Healthy People 2030 Objective	Greatly addresses a Healthy People 2030 objective	Slightly addresses a Healthy People 2030 objective	Does not address a Healthy People 2030 objective		
Population Impact	Has a clearly defined plan to reach out for access to intended population	Has a plan to reach out for access to intended population	Does not mention plan to reach out for access to intended population		
Timeline	Has a clearly defined timeline that includes sustainability after graduation/ matriculation	Has a clearly defined timeline	Does not address timeline		
Budget	Has a clearly defined budget	Includes some budgeting/un realistic budget	Does not define budget whatsoever		
Creativity	Project is innovative; never done before in defined population	Project has been tried before with similar populations, but not in WV	A similar initiative is well established within the defined population		
Video	Video submission is engaging, includes all members, & clearly	Video submission leaves viewer with questions	No video submission received
